# Learning and Behavior Workshop Objectives

This workshop provides an intimate setting to develop an understanding of the principles of Applied Behavior Analysis (ABA). You will gain hands on experience with a variety of species and gain skills to better understand, predict and change behavior. Unique opportunity to observe individual and group dynamics, species-typical differences and behaviors.

- ◆ Learn to comprehensively assess behavior and environment problems.
- ◆ Learn how to apply behavior science in the exam room to maximize cooperation and minimize force.
- ◆ Learn how to functionally assess behavior problems and develop shaping plans to teach new skills.
- ◆ Learn to replace biting, excessive vocalizing, fear and destructive behaviors with successful alternative behaviors including targeting, step up, towel restraint, accepting oral meds, presenting a foot and more!
